

United States Patent [19]

Halpern et al.

[11] Patent Number: 4,657,820

[45] Date of Patent: Apr. 14, 1987

[54] PLASTIC ARTICLE CONTAINING A TOP COAT COMPRISING AN ALBUMIN AND POLYSACCHARIDE MIXTURE

[76] Inventors: Gregory Halpern, Wilson Park Dr., Tarrytown, N.Y. 10591; Jack U. Gould, 500 E. 85th St., New York, N.Y. 10028

[21] Appl. No.: 852,602

[22] Filed: Apr. 16, 1986

ABSTRACT

Hydrophilic coating of plastics, particularly an enhanced aqueous solution of a polysaccharide which flows uniformly over the surface of an anchor film applied to the plastic. The aqueous solution of a polysaccharide from the group consisting of hyaluronic acid and its salts, chondroitin sulfate and agarose is enhanced by the addition of albumin to provide uniform wetting over the anchor film on the plastic.
